

Belly Buttons (G)  
capo 1

G                    D  
Belly buttons are fun  
                         G  
Too bad you only get one  
                         D  
They either go out or go in  
                         G  
But either way you still win

They connected you to your mom  
So they're kind of where you come from  
That's how she fed you through there  
And that's how she got you your air

Chorus:

                         C                    G  
Oh belly buttons are fun  
D                    G  
Too bad you only get one  
                         C                    G  
They either go out or go in  
                         D                    G  
But either way you still win

On the day you came out  
The whole room gave a big shout  
You weren't quite looking your best  
But we all loved you nevertheless

We cut your umbilical cord  
And we tied it up in a knot  
And the souvenir you took home  
Was the bellybutton you got

Chorus

So next time you look at your belly  
And you're thinking that thing just looks silly  
Remember it played a big part  
Of your life right at the start

And some day if you have a kid  
You're gonna nurture them like your mom did  
Through that funny looking small hole  
That's the bellybutton we know

Chorus
