

Take Care of Your Grownups (G)

Riff: G C C/B C/A G

G  
Children, take care of your grownups  
They're not quite as sure as they seem  
They're quickly confused and easily bruised  
And come right apart at the seams  
Children, take care of your grownups  
Who've been there since your life began  
They stumble and plod and their techniques are flawed  
But they're doing the best that they can  
Hey now we're doing our best, we're doing the best that we can

Riff

Children, take care of your grownups  
These weird looking people you know  
They're slow on the uptake and make lots of mistakes  
But sometimes their brighter lights glow  
Children, take care of your grownups  
Even when you know that they're wrong  
They stress and they guess and they're not that well dressed  
But they're trying so hard to be strong  
Hey now, we're trying so hard, trying so hard to be strong

A7  
It's a big, big world  
C And we are so small  
A7  
Sometimes even grownups feel  
C Like they're not so tall

So children, take care of your grownups  
Sometimes they're still just like kids  
Little girls and boys grasping for poise  
Just like their own parents did  
Children, take care of your grownups  
These disheveled women and men  
Hold them and keep them, love them and teach them  
They need you just like you need them  
Hey now, we need you, we need you just like you need us
